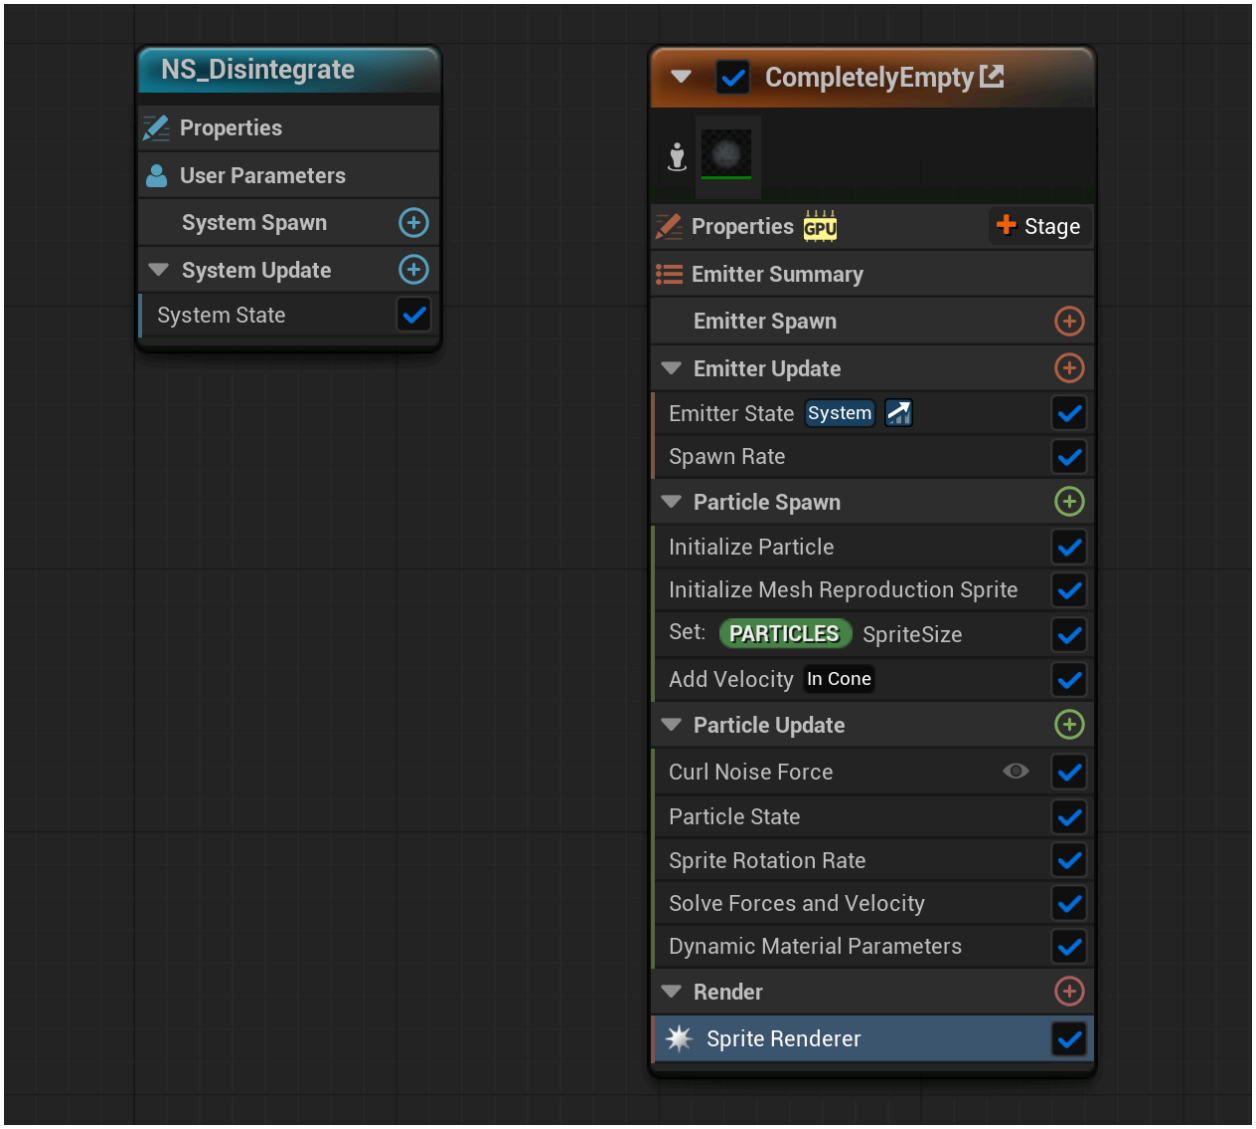
System and Emitter Blocks:



Parameters:

System State:

Loop Behavior: Once

Loop Duration: 10.0

Emitter Properties:

Sim Target: GPUCompute Sim

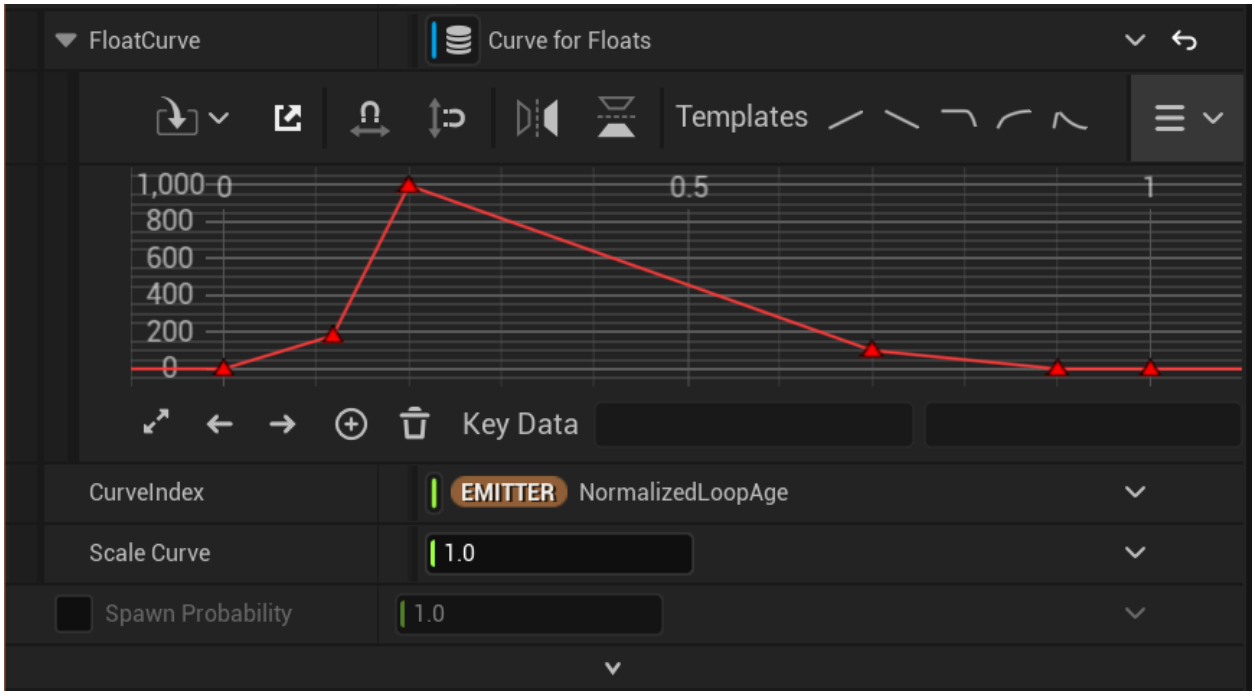
Calculate Bounds Mode: Fixed

Emitter State:

Life Cycle Mode: System

Spawn Rate:

Spawn Rate: Float from Curve



Initialize Particle:

Point Attributes:

Lifetime Mode: Direct Set

Lifetime: 10.0

Sprite Attributes:

Sprite Size Mode: Uniform

Uniform Sprite Size: 4.0

Initialize Mesh Reproduction Sprite:

Source Mode: Attach Parent

Set:

Particles Sprite Size: (1.6, 1.6)

Add Velocity:

Velocity Mode: Cone

Cone Angle: 30.0

Curl Noise Force:

Noise Strength: 15.0

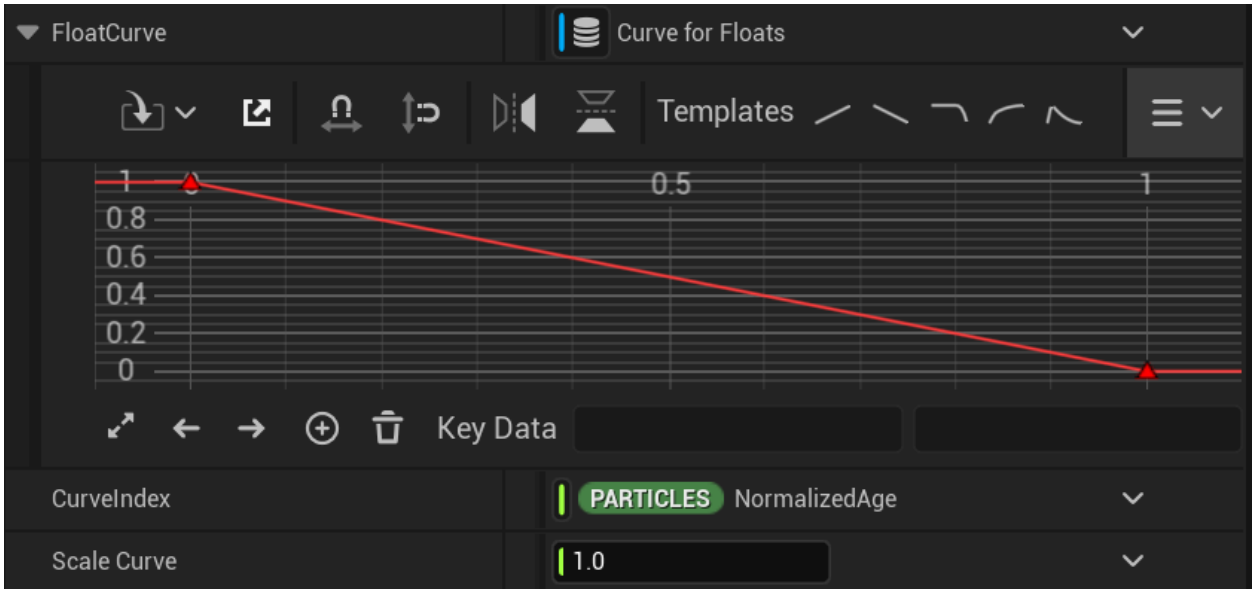
Sprite Rotation Rate:

Rotation Rate: 1000.0

Dynamic Material Instance:

Write Parameter Index 0: Float

Param1: Float from Curve



Rendering:

I use the sprite renderer and a material with a 2D spherical gradient for its opacity input.
